

INM370 – Advanced Databases

Tutorial 8 – Replicated Databases

This week's tutorial is based on the topic of replicated database systems.

*Question 1. Compare and contrast **eager** with **lazy** replication.*

*Question 2. Describe different ways of implementing a **replication architecture**.*

*Question 3. Discuss the **functionality** required of a **replication server**.*

*Question 4. List and discuss the main **replication schemes**.*
